I would love to work with the people in the company having similar interests and with people working on different domain, I would like to explore those.
I have worked on 2 web development projects for my academics. I have worked on a website for our college's club DRAIC(DYPCOE Robotics and AI club) for which link is - https://www.draicdypcoe.in/

Q1. Share academic project academic details.

For my project I worked on a Sports Registration Website for peer help of college regarding sports registration and management. I used HTML, CSS for frontend and PHP, MySQL for backend.

Another project I worked on is a interactive and visually pleasing website to promote our college club Draic (D y Patil robotics and AI Club). Website is based on ReactJS framework. Link- https://www.draicdypcoe.in/

Hobby
Reading, travelling

Any questions
What would be my role in company
Can you tell about company environment a little
What would you like me do to better prepare for the role

What are your expectations from company
My expectations for the company would be to **provide a work environment in which I can contribute to the team, I receive appreciation for my contributions, I have job stability and the ability to grow with the company**

I am skilled in html and css. I have worked with Wordpress, Bootstrap, ReactJS and php. I have worked on 2 web development projects for my academics. I have worked on a website for our college's club DRAIC(DYPCOE Robotics and AI club) for which link is - https://www.draicdypcoe.in/

Php: I have worked on 2 web development projects for my academics. First one a Sports Registration Website using HTML, CSS, PHP, MySQL. Pharmacy Management is another project I worked on using PHP as well.

Last book I read is the book about creating healthy habits, science behind that and how to get better at keeping your habits intact. The main takeaways of the is that small changes can have large impact which is concept of butterfly effect. Butterfly effect comes from fact that flaps of butterfly somewhere can change the direction of a hurricane. Changes that seem small and unimportant at first will compound into remarkable results if you're willing to stick with them for years. Trust the process. Habits define you.
